

Edunabio - Most important results

DAAD: Educational Network in Agrobiodiversity – EDUNABIO – Bildungsnetzwerk Agrobiodiversität (Projekt-ID: 57060601)

Catalogue of courses (MSc) modified regarding aspects of agrobiodiversity

In total during the project time 23 courses were modified and more emphasis was given to aspects of biodiversity. The descriptions of the contents of the courses were compiled in a document and sent to all partners

(document: Course catalogue_biodiversity)

Development of an evaluation scheme

The evaluation scheme can be used to evaluate the quality of teaching in the MSc courses. Together with the partners the scheme was developed and tested during the project

(document: Example_of_evaluation_results)

Data collection of Agro-biodiversity

An extensive English-language data and facts collection on the subject of agrobiodiversity is available and has been distributed to all project partners

(document: Table_of_contents_collection_Agrobiodiversity)

4 Workshops in Cuba, Nicaragua, Colombia and Argentina

In total 4 workshops including excursions were organized bringing together scientist, students, farmer, and further stakeholders

(document: All_workshops2014_2017)

More than 100 mobility activities regarding education and research in agro-biodiversity

New cooperation agreements between the partners of the project

(document: Convenios EDUNABIO)

Knowledge transfer

Materials and practical recommendations on various areas of agrobiodiversity are available and were distributed to farmers and advisory services as part of the excursions

(document: List_knowledge_transfer)

Further:

- Several press releases during the project (Focus, Ostseezeitung, homepage University of Rostock etc)
- Training on remote and blended learning (given by Guillermo Antunez (Cuba))

Final documents are also available at the homepage of the department Agronomy of the University of Rostock: <https://www.auf.uni-rostock.de/professuren/h-w/pflanzenbau/edunabio/>
