International Students Rostock

Origin

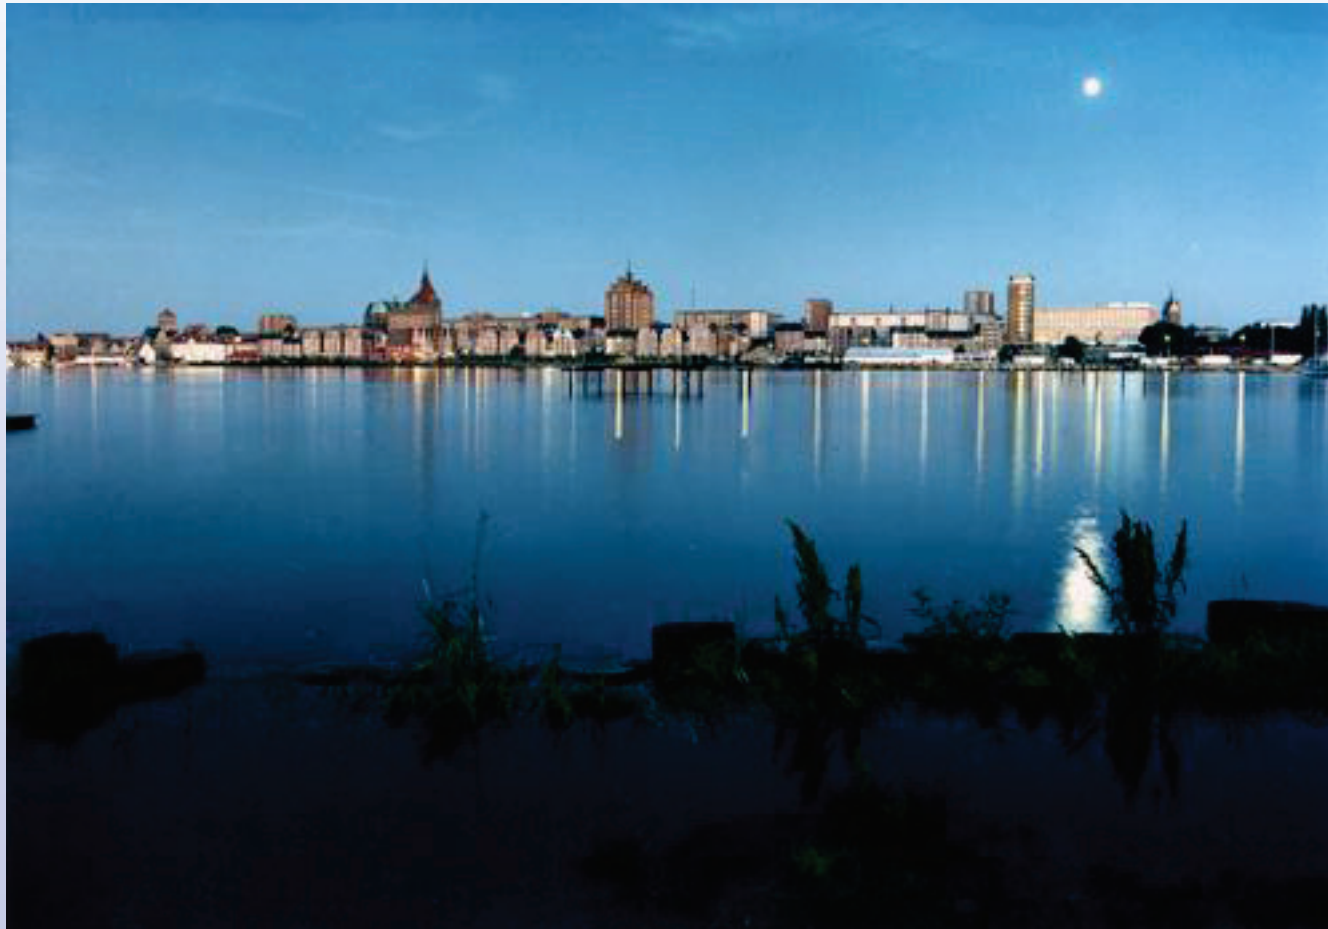

(Stand: WS2011/2012)

International Students Germany

WELCOME in Rostock

- **Federal Republic of Germany:**
- Responsibility for (higher) education lies with the individual states (Länder)
 - i.e. basic funding, organisation, governing laws
- Federal government has a very limited role to play:
 - can legislate on issues related to access to higher education and academic qualifications, can co-finance research projects
- Thus the actual structure and organisation of the various systems and institutions may differ from state to state
 - e.g. fees, accreditation, types of institutions, governing bodies, autonomy
- Certain basic principles have been agreed on by the states in order to guarantee same conditions of study and mobility within Germany

- Bologna Process (Studies)
- Excellence Initiative (Research)
- Increasing degree of autonomy for Institutions (Administration)
 - budget control, human resources
- Higher Education in Germany: very dynamic environment in the last 10-15 years with many changes

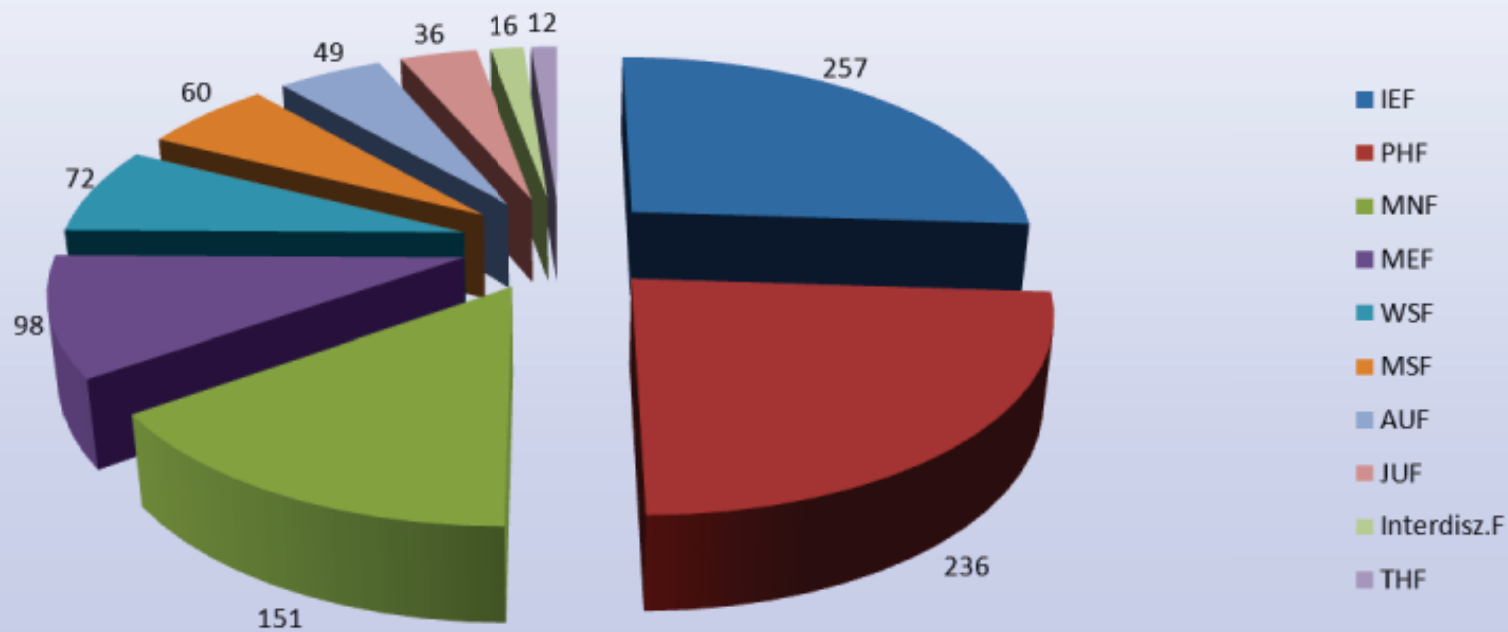

- **Major reform of higher education systems in Europe:**
- Start: 1999, Participants: 47 countries
- Main objective: creation of a common European Higher Education Area
 - supporting mobility for students and teachers at an international level
 - promoting the mutual recognition of grades and exams across the member countries
 - increasing the attractiveness of Europe also to non-European students
- Basic framework adopted: three cycles of higher education
 - 1st cycle: Bachelor's degree, 3-4 years
 - 2nd cycle: Master's degree, 1-2 years
 - 3rd cycle: PhD degree, ~ 3 years
- Use of the European Credit Transfer and Accumulation System (ECTS)
- 2012: 85% of all German study programs according to new framework (B.A., B.Sc., B.Eng., M.A., M.Sc., M.Eng.)
